ACADEMIC QUALIFICATIONS

- ❖ B. Tech (CSE) | Corporate Institute of Science and Technology, Bhopal ~ **7.25 CGPA (till)**
- ❖ 12th | K.N +2 High School , Hazaribagh **84.4%** | (2022)
- ❖ 10th | K.N +2 High School , Hazaribagh **82.4%** | (2020)

ABOUT

Hi, I'm Firdosh Khan — a self-taught and driven Full Stack Developer focused on building real-world applications using the MERN stack. I love solving problems, shipping features fast, and learning by doing. From building e-learning platforms to note-sharing tools, I enjoy working on projects that have real impact. I'm currently in my 6th semester of B.Tech (graduating in 2026), deepening my React and backend skills, and actively seeking a full-time role or internship at a startup where I can contribute and grow from day one. I have hands-on experience in integrating and building RESTful APIs for web applications.

PROJECTS

❖ StudyNotion – React.js | Node.js | Express.js | MongoDB | JavaScript | Git | Razorpay

- Designed and developed a complete **MERN stack** e-learning web application with **role-based authentication** (Student, Instructor, Admin).
- Integrated **OTP-based login**, secure **password reset**, and **payment gateway (Razorpay)** for real-time course purchases.
- Built dynamic **React components** for creating and managing courses, sections, subsections, and video content.
- Instructors can create, update, publish, and manage paid courses.
- Students can **add to cart**, **wishlist**, **purchase courses**, **track progress**, and **leave reviews**.
- Developed and consumed **RESTful APIs** for authentication, course operations, and user profile management.
- Used **React Router**, **Context API**, and **custom hooks** for seamless frontend routing and global state management.
- Ensured secure backend using **JWT**, **bcrypt**, and best practices in user/session handling.

❖ NoteVault – Paste & Note Management App - React.js | Redux Toolkit | JavaScript

- Developed a full-featured paste saver app to **create**, **search**, **delete**, and **share** notes/snippets.
- Users can enter a **title** and **content**, then generate a new paste via a “Create Paste” button.
- Built a **/pastes route** to view all saved entries and a **search bar** to filter pastes in real-time.
- Enabled **delete functionality** and **sharing** through unique paste URLs.
- Managed global state using **Redux Toolkit**, including slice management and async actions.
- Used **React Router** for navigation and structured the app using a clean component hierarchy.

TECHNICAL SKILLS

- ❖ **Programming Languages:** C++, JavaScript
- ❖ **Frontend:** React.js, HTML, CSS, JavaScript
- ❖ **Backend:** Node.js, Express.js
- ❖ **Web API:** RESTful APIs
- ❖ **Database:** MongoDB, PostgreSQL
