ACADEMIC QUALIFICATIONS

❖ B. Tech (CSE) | Corporate Institute of Science and Technology, Bhopal ~ 7.25 CGPA (till)

❖ 12th | K.N +2 High School , Hazaribagh
84.4% | (2022)

❖ 10th | K.N +2 High School , Hazaribagh
 82.4% | (2020)

ABOUT

Hi, I'm Firdosh Khan — a self-taught and driven Full Stack Developer focused on building real-world applications using the **MERN stack**. I love solving problems, shipping features fast, and learning by doing. From building e-learning platforms to note-sharing tools, I enjoy working on projects that have real impact. I'm currently deepening my React and backend skills, and actively seeking a full-time role or internship at a startup where I can contribute and grow from day one.

PROJECTS

- StudyNotion JavaScript | Node.js | MongoDB | React | Git
 - Designed and developed a complete MERN stack e-learning web application with role-based authentication (Student, Instructor, Admin).
 - Integrated OTP-based login, secure password reset, and payment gateway (Razorpay) for real-time course purchases.
 - Built dynamic React components for creating and managing courses, sections, subsections, and video content.
 - Implemented responsive dashboards:
 - Instructors can create, update, publish, and manage paid courses.
 - Students can add to cart, wishlist, purchase courses, track progress, and leave reviews.
 - Developed and consumed RESTful APIs for authentication, course operations, and user profile management.
 - ② Used **React Router, Context API**, and **custom hooks** for seamless frontend routing and global state management.
 - 2 Ensured secure backend using JWT, bcrypt, and best practices in user/session handling.
- NoteVault Paste & Note Management App React.js | Redux Toolkit | JavaScript
- o Developed a full-featured paste saver app to create, search, delete, and share notes/snippets.
- o Users can enter a **title** and **content**, then generate a new paste via a "Create Paste" button.
- o Built a /pastes route to view all saved entries and a search bar to filter pastes in real-time.
- o Enabled **delete functionality** and **sharing** through unique paste URLs.
- Managed global state using Redux Toolkit, including slice management and async actions.
- Used **React Router** for navigation and structured the app using a clean component hierarchy.

TECHNICAL SKILLS

❖ Programming Languages: C++, JavaScript Web Technologies: HTML, CSS

IT Constructs: OOPS
Framework: React JS , Next JS ,Express JS

❖ Database: MongoDB, PostgreSQL Version Control: GitHub

❖ Full-Stack Development: MERN Stack (MongoDB, Express.js, React.js, Node.js)
