

FIRDOSH KHAN

Full Stack AI Engineer

Mumbai, India | +91 7979009875 | thefirdosh@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Engineer who builds end-to-end web applications, from React.js and Next.js interfaces to Node.js and Express.js APIs, TypeScript, PostgreSQL, MongoDB, and Prisma-backed data layers, plus authentication and deployment. Builds AI-powered applications using Python, FastAPI, LLM integration, RAG, and semantic search. Has delivered client projects in logistics, finance, and e-commerce, taking work from requirements through development and deployment.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frontend Development: React.js, Next.js, Tailwind CSS, Redux Toolkit, TanStack Query, Responsive Design

Backend Development: Node.js, Express.js, FastAPI, REST APIs, JWT, OAuth, RBAC, Middleware, Input Validation, WebSockets

Databases and ORM: PostgreSQL, MongoDB, Prisma ORM, Database Design, Query Optimization

AI and Generative AI: LLM Integration, RAG, LangChain, Semantic Search, Vector Embeddings, Prompt Engineering, AI Application Development

Tools, Cloud, and Deployment: Git, GitHub, Postman, Vercel, Render, Railway, n8n, CI/CD

PROFESSIONAL EXPERIENCE

Full Stack Developer | Encoder

Jan 2025 – Jan 2026

- Built full-stack web applications with Next.js, React.js, Node.js, Express.js, TypeScript, and PostgreSQL, covering the UI, backend APIs, database integration, and deployment.
- Designed REST APIs with JWT authentication, role-based access control (RBAC), input validation, and structured error handling.
- Integrated LLM-powered features using LangChain and RAG pipelines to enable context-aware querying and semantic search.
- Modeled PostgreSQL schemas and queries with Prisma ORM; deployed applications to Vercel, Render, and Railway.

Full Stack Developer (Freelance) | DubaiWebCreators

Jun 2024 – Present

- Delivered responsive websites and web applications for cargo/logistics and finance clients, translating business requirements into working client-facing products.
- Built a full-stack e-commerce application covering frontend interfaces, backend APIs, database integration, and third-party API integrations.
- Created n8n automation workflows that connect services and automate repetitive business tasks.
- Handled client projects end to end, from requirements through frontend, backend, and deployment.

PROJECTS

ShopMind AI – AI-Powered E-Commerce Platform

In Progress

Tech Stack: Next.js, TypeScript, Express.js, PostgreSQL, Prisma, LLM, Semantic Search

- Designed product, category, subcategory, specification, filtering, and search workflows to support AI-driven product discovery.
- In progress:** building natural-language product search and product comparison using LLM-powered search and retrieval.

CareerPilot AI – AI Resume and Interview Assistant | [Live Demo](#)

Tech Stack: LLM, RAG, LangChain, MongoDB, Puppeteer, Vercel

- Built an LLM and RAG application with LangChain that matches resumes to job descriptions using semantic similarity and skill-gap analysis.
- Applied prompt engineering to generate interview questions tailored to the resume and target role.
- Implemented PDF generation with Puppeteer, stored data in MongoDB, and deployed on Vercel.

Interviewlyyy – Real-Time Interview and Collaboration Platform | [Live Demo](#)

Tech Stack: React, Node.js, Express.js, MongoDB, WebSockets, Stream SDK, Piston API, TanStack Query

- Built a real-time platform with React, Node.js, Express.js, and MongoDB, supporting video calls, chat, and screen sharing through Stream SDK.
- Implemented collaborative coding with code execution through the Piston API.
- Added OAuth authentication and role-based access control; used TanStack Query for client-side data fetching.

EDUCATION

B.Tech in Computer Science and Engineering | RGPV University

2022 – 2026

CGPA: 7.8/10 | Class 12: 84.4% (2022) | Class 10: 82.4% (2020)
